Backdrop

We all know that data collection is one of important step in the research process for testing the hypotheses or answering the research questions or finding the solutions of the problem. A number of methods & tools are used for collecting the data which may be quantitative or qualitative. The appropriateness of the tool depends on the objectives of the study & nature of the data. Each research tool employs distinctive way of describing & quantifying data in addition to its development & standardization procedures. The use of right research tools not only facilitates the collection of relevant data but also influences the finding of the study. Thus, knowledge of research tool development & its process of standardization becomes necessary for every researcher. In this backdrop, one week online national FDP has been organized with an intent to give insight in the process of development & standardization of various research tools.

Objectives

The objectives of this programme are:

- to familiarize with various types of research tools viz. questionnaire, opinionnaire, rating scale, etc.
